

Grip® film

take control of site safety

The Grip Film system is a high-performance, pre-stretched pallet wrap with an ergonomic applicator to complete the system.

It's your answer to a eco-friendly, quick, safe, easy and cost effective way to wrap your pallets every time.

- Fewer, faster roll changes
- Reduced risk of injury
- Less tension required

See reverse for more information!

Grip® film

If your operation is spread over a large area with separate teams picking and building orders ready for despatch – then Grip® hand wrapping is your most cost and time effective option. Grip® film is a new unique self-gripping film system which provides huge cost-saving, environmental and user-friendly benefits.

FASTER

- quicker pallet wrapping time
- Twist-Lock system means roll changes happen in seconds

GREENER

- reduces your company's carbon footprint and plastic use
- the dispenser ensures rolls run right to the core

SAFER

- lightweight & ergonomic dispenser with skid plate
- reduced risk of back strain, friction burns and knuckle abrasion

BETTER

- puncture resistant with reinforced edging
- less tension required
- does not need to be stretched around the pallet
